RegaLead is the market leading supplier of decorative glass components to the window and door industry and our Signature range of insulated glass units for the composite door market, was first introduced in 2005 and has gone from strength to strength.

Since its inception, Signature Options has become the leading brand in the door glass market and our products are used by many of the UK's leading composite door producers. Offering a wide range of glass styles to fit most composite doors glazing styles, the Signature Options range combines great design with high performance, bringing together the finest decorative glass components with the latest in insulated glass technology to provide a glazing solution second to none.

In this latest edition of our catalogue, we have undoubtedly the widest range of glass options available from any supplier, with designs and styles to suit all tastes.

Photograph courtesy of Force 8 Fabrications Ltd

Decoration with added Performance

Modern Composite doors are a combination of great looks and high performance, with strength, low maintenance and probably, most important of all, superb energy efficiency.

As energy costs continue to rise, choosing a door that keeps in the heat and keeps out the cold is now more important than ever - and composite doors are the most energy efficient on the market today. The performance of the door is achieved by a combination of the latest technologies which include the glass elements.

The decorative glass designs in this catalogue combine great aesthetics with high performance, by using Pilkington low-e glass combined with argon gas in the cavity to reduce the amount of heat loss through the glazed area. All our units are also sealed using warm edge spacer technologies to reduce the heat transfer at the edges of the glass.

Most heat loss occurs at the edge of the glass. Super Spacer blocks heat loss to keep the warmth inside your home.

Half Moon Half Moon & Mids Top Lites Top Lites & Mids 6 Lite Oval 9 Panel 8 Panel Cottage Square Cottage Short Cottage Long Cottage 2 Lite Cottage 4 Lite Full Glaze

With a multitude of glass designs, options and door styles to choose from, our Signature range allows you to personalise your home effortlessly.

The entrance to your home is important because first impressions really do count. We believe it's important that your door reflects your personal taste, style and character to a tee.

Inspirational, beautiful and the ultimate in stylish practicality, Signature Glazing Options has been created to provide you with a wealth of choice to enhance your composite door and create a first impression that speaks volumes.

With 20 years experience in the decorative glass market, we've brought together a stunning range of traditional and contemporary glass options to suit most tastes, budgets and homes.

You can expect the unexpected too. Our ethos for innovative design and uncompromising quality has transformed the way doors are perceived, enjoyed and used. Take our built in Venetian blinds; uncluttered, elegant and functional. Pure genius.

All products are manufactured to conform to high quality standards and come with a full 10 year guarantee.

Brass & Zinc Art Range

Our range of Triple Glazed design options are constructed using hand-cut bevels and beautifully textured glass pieces, which are assembled using traditional stained glass methods into a Zinc or Brass came. The decorative glass is then encapsulated between two pieces of tempered safety glass to give excellent thermal and sound insulation with the added benefit of an easy to clean smooth surface.

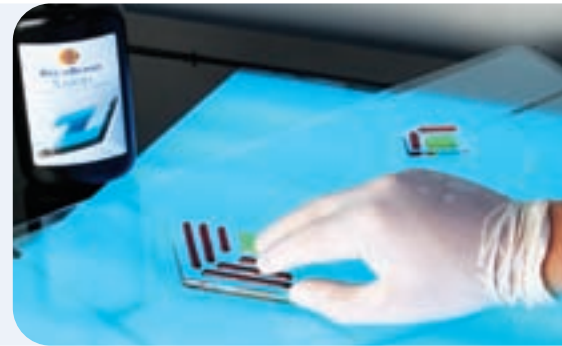

- *Stunning visual effect with multiple glass textures and bevels*
- *All units are triple glazed for easy cleaning and extra security*
- *It is however, not possible to create matching sidelights or toplights*
- *Changes to the glass types used or came colours is not possible*

Etch Effect & Fusion Art Range

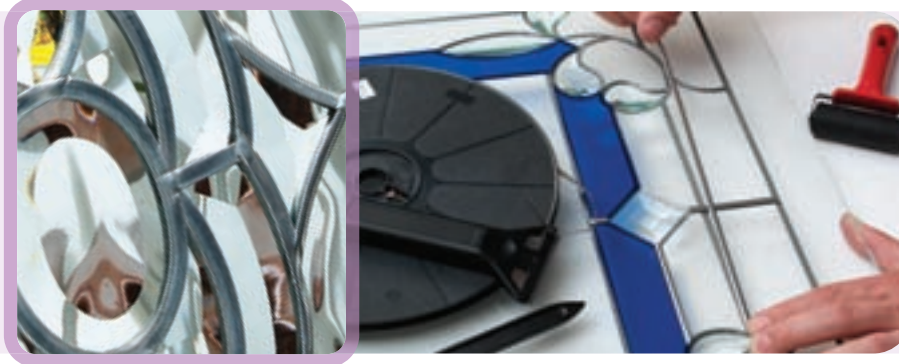

Our range of Etch Effect designs combine a simple etched glass effect with either traditional hand cut glass bevelled glass or truly stunning fused glass elements. These are bonded to the surface to provide a 3-dimensional effect that can not only be seen, but felt. These ranges use the finest materials and the most up-to-date techniques to produce designs that are simple, yet refract light beautifully, to create a focal point to your entranceway.

- *Contemporary glass designs using fused glass elements*
- *Dual Glazed construction so you can touch the fused elements*
- *Colour changes available to match or compliment the door colour*
- *It is however, not possible to create matching sidelights or toplights*

Overlay Art Range

Our range of Overlay designs incorporate genuine lead strips, handmade coloured effect films and handcrafted bevelled glass to create 21st century decorative glass. All the decorative elements are on the outer pane of tempered safety glass and you can choose from a wide range of Pilkington texture glass options for the inner pane to give varying levels of privacy. With this technique it is also possible to create matching toplights and sidelights.

- *Dual Glazed construction*
- *Large range of Pilkington Texture backing glasses available*
- *It is possible to create matching sidelights and toplights*
- *Where available colours can be changed to match the door*

Resin & Satin Art Range

Our range of Resin and Satin Art designs are manufactured using state of the art resin dispensing equipment to create the outline, the colours are then hand painted. The Resins offer an alternative to lead profiles and create much finer lines. Our Satin Art designs use clear resin as a contrast to the subtle etched glass to create a modern and striking effect, similar to brilliant cutting.

- *Fine lines and hand-painting allow for very intricate designs*
- *Large range of Pilkington Texture backing glasses* available*
- *It is possible to create matching sidelights or toplights*

*Not required with Satin Art designs

Prairie

Simplicity, balance and exceptional quality. The purity of this linear range draws its inspiration from Frank Lloyd Wright, one of America's greatest architects.

Hints of cubism come together with leading edge glass technology to create a wonderful multi-textured finish and a surprisingly contemporary design. With an easy clean finish, the encapsulated bevelled glass elements and delicately patterned chip glass are attractively bordered by polished zinc coming.

Back Door Options

Introduce a touch of creative innovation to your home with a choice of stunning options for your kitchen and back doors.

Control light and privacy with instant fingertip control when you select an integrated door blind. Let the fresh air in but keep summer insects out with an attractive Venting Sash in your kitchen, or simply enjoy the beauty of your garden through a Decorative Clear Glazed door guaranteed to brighten your day.

Venetian Blind

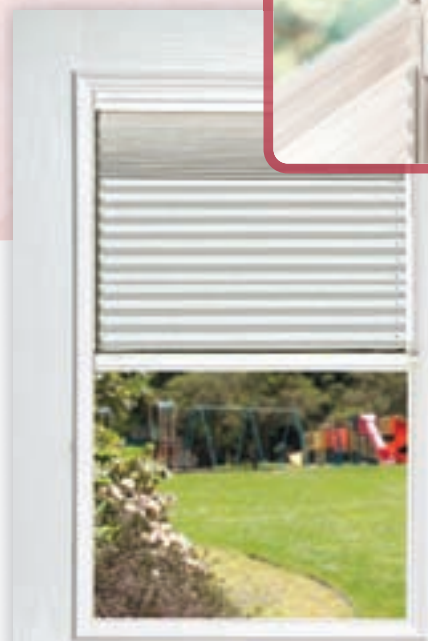

This Venetian blind is cleverly encapsulated within the insulated glass cavity of this door to provide a zero maintenance blind. The blind can be raised, lowered and easily tilted using the unobtrusive fingertip control on the edge of the frame.

Say goodbye to tiresome dusting and hello to a beautifully controlled environment you'll love.

Pleated Shade

Introduce a contemporary feel to your home with a fully encapsulated Pleated Shade blind. Keep rooms cool and cut out annoying glare at any time of the day. For the ultimate in uncluttered elegance, the Pleated Shade is hard to beat.

Madison Iron

Dramatic and evocative of old world charm. The beautifully produced and fully encapsulated wrought iron detailing on this stunning door creates an original and rustic accent for the rear of your home.

Venting Sash

The Signature Venting Doorlite is a revolutionary product, incorporating a sash window into a standard door opening. The perfect door for your kitchen, this smart innovation offers you excellent ventilation, whilst the integrated fly screen ensures you don't attract any unwelcome visitors. Simple fingertip control allows you to instantly respond to the changing atmosphere in your kitchen.

Decorative Clear Glazed

Create a seamless transition from the natural beauty of your garden to your interior living space with a Decorative Clear Glazed door. We recommend either Mackintosh Rose or Crystal Inspiration, as their delicate border design will allow you to enjoy an unobstructed view of your garden whether it rains or shines.

French Doors

French Doors create an aesthetic gateway to the calm and restful atmosphere of your garden.

Whether you choose to enjoy an uninterrupted view or wish to control the light and privacy of your restful nook, you'll find the perfect solution right here.

Venetian Blind

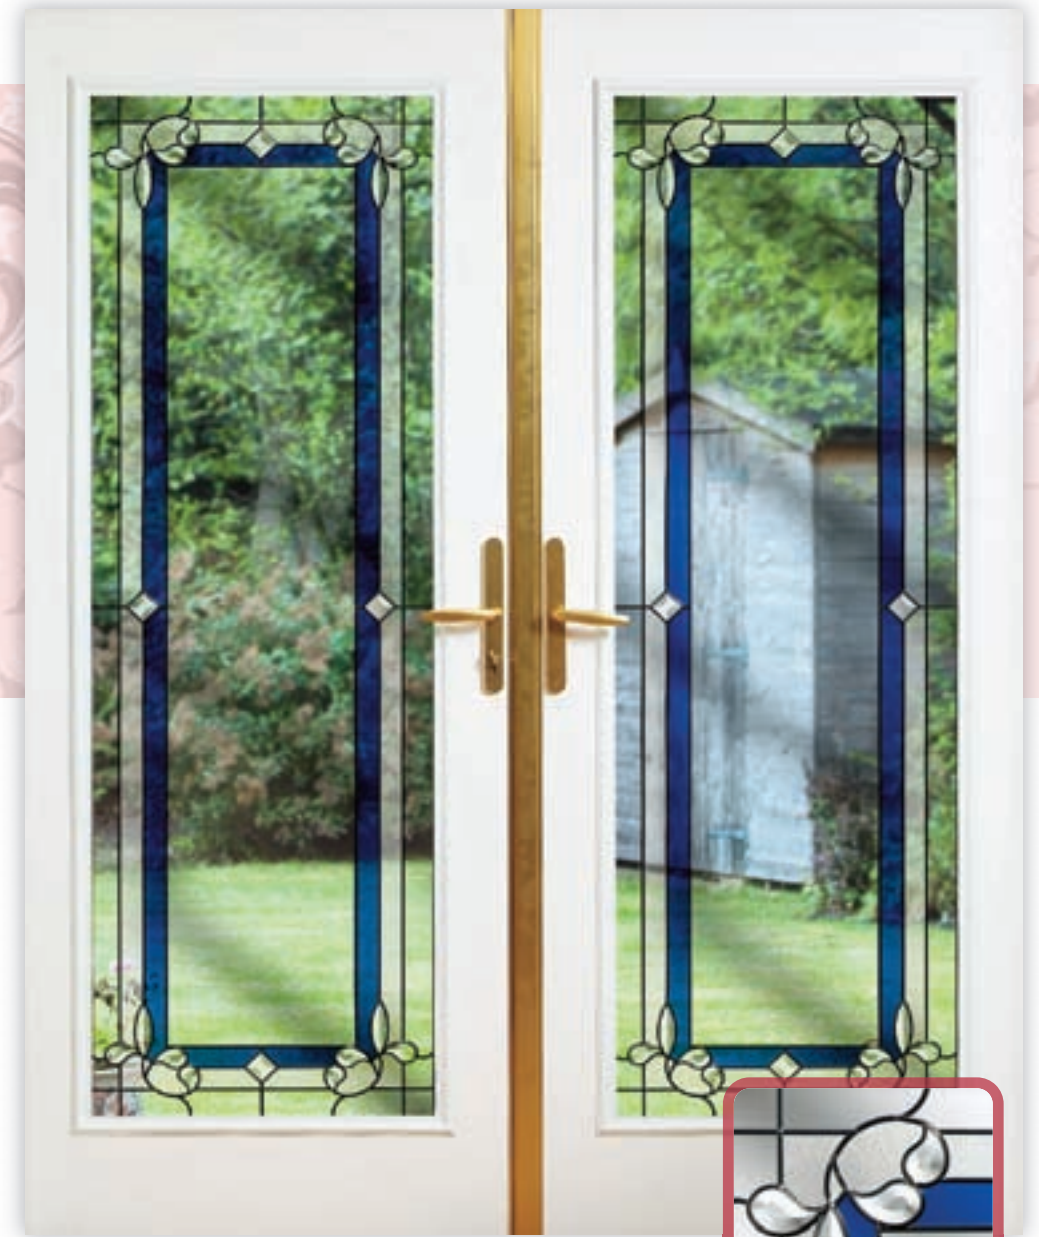

This Venetian blind is cleverly encapsulated within the insulated glass cavity of these French doors to provide a zero maintenance blind. The blind can be raised, lowered and easily tilted using the unobtrusive fingertip control on the edge of the frame. Say goodbye to tiresome dusting and hello to a beautifully controlled environment you'll love.

Zinc Art **Panache**

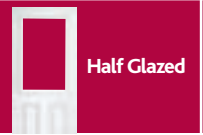

Subtly embellished with a fresh, light design and triple glazed for superb insulation and security. All you need to do is sit back, relax and enjoy.

Overlay Art **Crystal Inspiration**

Encapsulating beautiful lines and a subtle floral design inspired by nature. The perfect spot to rest and recharge your batteries.

Sidelights & Toplights

For our Overlay and Resin Art designs, it is possible to offer matching decorative glass for custom or composite sidelights and toplights, or to simply compliment the designs by using the same backing glass options.

For our Brass & Zinc Art designs, due to the complex manufacturing techniques involved, it is only possible to have matching decorative glass by using a composite sidelight. For non-composite sidelights and toplights, we recommend the use of 'glue-chip' glass to compliment the Brass & Zinc Art products.

Zinc Art Prairie with glue-chip in custom split sidelight

Zinc Art Elegance with matching double composite sidelights

Zinc Art Clarity with glue-chip glass toplight

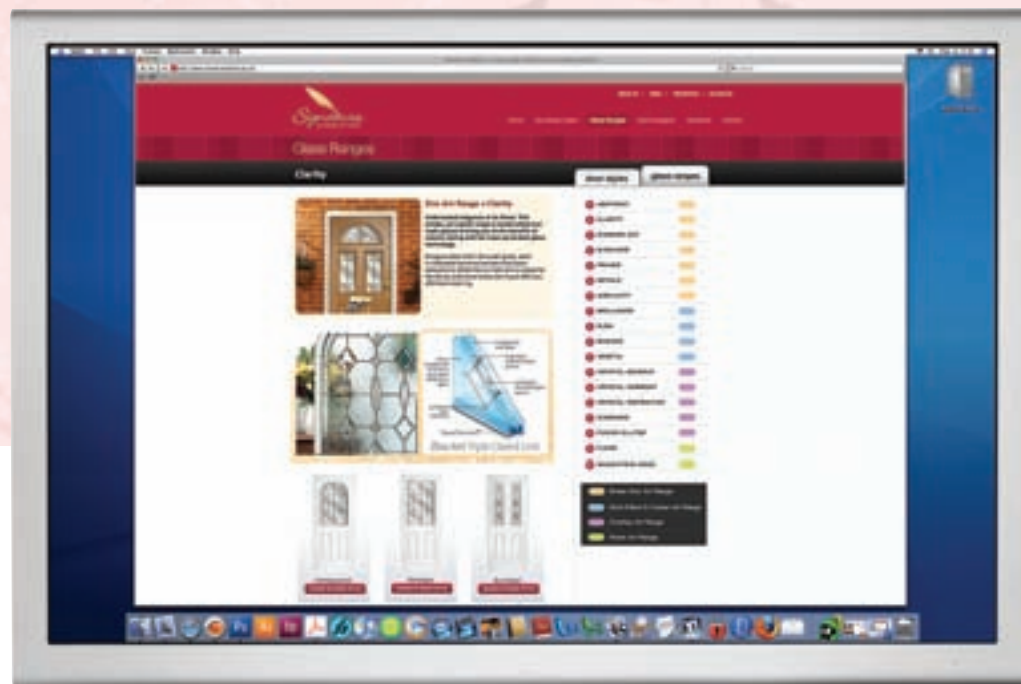

Overlay Art Diamonds with custom full sidelight

Resin Art Fleur with custom split sidelight

Guarantees, Warranties and Technical Performance

Brass & Zinc Art Ranges

Our range of Brass and Zinc Art products are manufactured by traditional methods with individually hand cut glass surrounded by Brass or lead came and the decorative leaf is then encapsulated between 2 layers of safety glass (either tempered/toughened glass or 6.4mm laminated glass). The glass has been tested to EN12150 and EN14449 as applicable and the overall sealed unit to the EN1279 standard. As these items are manufactured using traditional art glass small seeds or blemishes in the glass are not deemed to be a fault and actually add to the products traditional look. The products are manufactured to exacting standards to reduce the amount of rattle that can occur when a door is slammed. All products are designed to ensure they pass our 50,000 slam test without breaking.

Fusion Art

The Signature Fusion Art ranges are manufactured by a network of approved UK insulated glass manufacturers. These double glazed units are manufactured to EN1279 and the glass conforms to EN12150 or EN14449 for impact safety. Our Fusion Art designs are a combination of etched effect glass and hand made fused glass elements that are bonded using high performance UV adhesives. The decorative leaf is normally the outer pane of an insulated glass unit. In the manufacture of Fused glass small bubbles do occur and are part of the beauty of the product, therefore small imperfections are not deemed as faults.

Overlay Art

The Signature Overlay Art ranges are manufactured by a network of approved UK insulated glass manufacturers. These double glazed units are manufactured to EN1279 and the glass conforms to EN12150 or EN14449 for impact safety. All the materials used in the manufacture of the Overlay Art ranges are manufactured by RegalLead. The decorative design is on the outer pane of the insulated glass unit and we therefore recommend that Antique or Brass coloured electroplated leads are used as they are more weather resistant. These lead finishes should only be cleaned with warm soapy water and the use of strong solvent based cleaners is not recommended. The coloured films used in the designs are manufactured using high quality polyesters and UV stable inks and are guaranteed not to fade more than 10% from their original colour over the 10 year warranty period.

Resin Art

The Signature Resin Art ranges are manufactured by a network of approved UK insulated glass manufacturers. These double glazed units are manufactured to EN 1279 and the glass conforms to EN12150 or EN14449 for impact safety. The outline resins are applied using computer controller machinery to ensure an accurate plot of the design. The colours are applied later by hand and small imperfections can occur in the paint which should not be deemed as a fault. The technology used is manufactured and supplied by CadRam and the materials have been extensively tested for weathering performance and durability on the outer pane of an insulated glass unit. The colours are guaranteed not to fade more than 10% from their original colour over the 10 year warranty period.

Door Blinds and Shades

The Signature range of door Blinds are constructed as 26mm units and can only be used with the glazing cassette supplied. The blind and shade systems are magnetically controlled and fitted inside the cavity of a certified toughened glass insulated glass unit. The products are guaranteed against discolouration and mechanical failure for 10 years for the blinds and 5 years for the shades. The products are rigorously tested and in the laboratory are operated through 10,000 cycles to ensure years of reliable operation.

Venting Sash

The Signature venting Sash is a PVC sash window designed to fit into a standard 1/2 glazed door opening and is only suitable for use with 44mm door slabs. The product carries a 10 year guarantee covering mechanical performance, IG unit quality and water resistance. The product is supplied as a complete system without the need for a glazing cassette and therefore is only available in white. The Glass units in the Venting Sash are manufactured using warm edge technology from Intercept as opposed to conventional aluminium spacer bars and are certified. The complete system has been tested successfully to the Canadian standard CAN/CSA A440-M90 standard which covers air and water infiltration, wind load resistance, ease of operation and strength and resistance to forced entry.
