With a multitude of glass designs, options and door styles to choose from, our DoorGlass range allows you to personalise your home effortlessly.

The entrance to your home is important, because first impressions really do count. We believe it's important that your door reflects your personal taste, style and character to a tee.

Inspirational, beautiful and the ultimate in stylish practicality, Signature Glazing Options has been created to provide you with a wealth of choice to enhance your composite door and create a first impression that speaks volumes.

With over 20 years experience in the decorative glass market, we've brought together a stunning range of contemporary and traditional glass options to suit most tastes, budgets and homes.

You can expect the unexpected too. Our ethos for innovative design and uncompromising quality has transformed the way doors are perceived, enjoyed and used. Take our built-in Venetian blinds; uncluttered, elegant and functional.

All products are manufactured to conform to high quality standards and come with a full 10 Year Manufacturer's Guarantee.

## SIDELIGHTS

If you would like to maximise the amount of light in your hallway, why not look to our new range of sidelight designs which will not only give you a stylish entrance, but also provide a light, airy feel when entering your home.

Most of our decorative glass ranges are now available with either complementary glass, composite or custom-matched sidelights. Full details of which ranges of decorative glass have sidelight options are shown on pages 90 to 93 and throughout this brochure. We have also clearly illustrated which types of options are available with each decorative glass range.

**Complementary Glass**

A patterned glass unit that picks out a feature glass from the decorative panel.

**Composite Sidelight**

A decorative design to fit composite sidelights in half, 3-quarter and full length. Manufactured in the same way as the door glass.

**Custom Decorative Sidelight**

A bespoke designed and manufactured unit, to match-up with the decorative glass in the door.

## NON-DECORATIVE OPTIONS

### Standard and Standard Plus Glass

Pages 80 - 83

A range of standard glass offers a 'value decorative option' with the use of subtly textured patterned glass.

### Gridlite Etch

Page 84

Harking back to times gone by, we have managed to develop an offering of elegant grid designs which can give a solid, secure and traditional feel to a modern entrance door.

### Back Door

Page 86

The ultimate in privacy when the sun goes down. A Venetian Blind, encapsulated in the glass unit of your chosen back door, or our unique Venting Sash as an alternative to a stable door.

### French Doors

Page 88

Double the door, double the light! These door and glass combinations enhance your living area, whilst at the same time, making that crucial connection between you and your garden.

### Sidelights

Pages 90 - 93

Most of our decorative glass ranges are now available with either complementary glass, composite or custom-matched sidelights.

# SIGNATURE

A R T R A N G E

Our range of Signature triple glazed units are constructed using hand-cut bevels and beautifully textured glass pieces, which are assembled using traditional stained glass methods into zinc or brass comes. The decorative glass is then encapsulated between two pieces of tempered safety glass to give excellent thermal and sound insulation with the added benefit of an easy to clean, smooth surface.

- All Signature units are supplied with Energy+ as standard
- Stunning visual effect with multiple glass textures and bevels
- All units are triple glazed for easy cleaning and extra security
- Changes to the glass types used or came colours is not possible
- Fully customised sidelights and toplights are available on a limited range of designs
- Complementary and composite sidelights are available on the entire range

# Reflections

This stunning contemporary design incorporates clear, etched and subtle grey glass in a striking design, where light beautifully refracts and reflects off the bevelled edges. The glass choices provide high levels of privacy whilst still allowing light to flood into your home. The design is manufactured using high gloss, black chrome coming.

ART RANGE

Our range of Etch-effect and Fusion designs combine a simple etched glass effect with either traditional hand cut glass bevelled glass or truly stunning fused glass elements. These are bonded to the surface to provide a 3-dimensional effect that can not only be seen, but felt\*. These ranges use the most up-to-date techniques and finest materials to produce designs that are simple, yet refract light beautifully, to create a focal point to your entranceway.

- Contemporary glass designs using fused glass or bevelled glass elements
- Double Glazed construction so you can touch the fused elements\*
- Colour changes available to match or complement the door colour\*

ART RANGE

Our range of Crystal Art designs are manufactured using a highly advanced multi-patented technology that allows us to create incredibly detailed bevelled effect designs that would be impossible with traditional glass decoration techniques. The advanced resin system we use to create these stunning range of designs provide functionality as well as decoration with sound insulation and breakthrough resistance properties that are unsurpassed.

- Encapsulated inside a double glazed unit for easy cleaning
- Stunning bevel effects which beautifully refract the light
- High levels of privacy with textured glass effects and prismatic bevel effects
- It is not possible to produce complementary or custom sidelights

# RESIN & SATIN

ART RANGE

Our range of Resin and Satin Art designs are manufactured using state-of-the-art resin dispensing equipment to create the outline, the colours are then hand painted. The Resins offer an alternative to lead profiles and create much finer lines. Our Satin Art designs use clear resin as a contrast to the subtle etched glass to create a modern and striking effect, similar to brilliant cutting.

- Fine lines and hand-painting allow for very intricate designs
- Large range of Pilkington textured backing glasses\* available
- Manufactured using our in-house developed CadRam resin dispensing technology

\* Not required with Satin Art designs

## GridLite Etch

The use of divided lights in door glazing has always been a popular option and modern composite doors can maintain that period look with GridLite.

These simulated divided lights are complemented by an offset etched glass to maintain privacy whilst maintaining high levels of light transmission. The range of five options cover many eras of housing style, from the late Georgian period through to the 'roaring 20s', yet look equally at place in a modern home.

## NON-DECORATIVE OPTIONS

## Venetian Blind

Control light and privacy with instant fingertip control when you select an integrated door blind. This Venetian blind is cleverly encapsulated within the insulated glass cavity of this door to provide a zero maintenance blind. The blind can be raised, lowered and easily tilted using the unobtrusive fingertip control on the edge of the frame. Say goodbye to tiresome dusting and hello to a beautifully controlled environment you'll love!

# Venting Sash

The Venting Sash is a revolutionary product, incorporating a sash window into a standard door opening. The perfect door for your kitchen, this smart innovation offers you excellent ventilation, whilst the integrated fly screen ensures you don't attract any unwelcome visitors. Simple fingertip control allows you to instantly respond to the changing atmosphere in your kitchen.

# French Doors

Full Glazed Doors create a pleasing and aesthetic gateway to the calm and restful atmosphere of your garden.

Whether you choose to enjoy an uninterrupted view or wish to control the light and privacy of your restful nook, you'll find the perfect solution right here.

### Venetian Blind

This Venetian blind is cleverly encapsulated within the insulated glass cavity of these French doors to provide a zero maintenance blind. The blind can be raised, lowered and easily tilted using the unobtrusive fingertip control on the edge of the frame. Say goodbye to tiresome dusting and hello to a beautifully controlled environment you'll love.

### Signature Art **Panache**

Subtly embellished with a fresh, light design and triple glazed for superb insulation and security. All you need to do is sit back, relax and enjoy.

### GridLite **Marseille**

Create a truly authentic 'French-door' look with our simulated, divided light option. The subtle etched perimeter sets this look off beautifully.

Note: Marseille is only available in 12mm glass unit thickness.

# Glazed Sidelights and Toplights

## Complementary Glass

With our extensive range of glass patterns, it is now possible to choose a side panel unit containing a texture to complement the glass design in your entrance door. The range contains the complete Pilkington Texture collection and several exclusive patterns. Complementary glass option is available for both Sidelights and toplights and is manufactured as triple glazed using warm edge spacer and low E glass to exceed current UK building regulations.

## Custom Decorative Glass

These bespoke decorative glass ranges have been developed to allow the glass design you have chosen for your entrance door, to be carried across into your sidelight. Each design is individually created and manufactured to work beautifully with the door glass.

We currently recommend custom sidelights to match Dual Glazed, Half Glazed, Half Glazed Arch and 3-Quarter glazed designs only. Due to the non-standard nature of these sidelights, extended manufacturing times are required.

## Composite Sidelights

This range of decorative glass options can be incorporated into a side panel whose frame is manufactured to the same specification as your entrance door. The complete range of decorative glass designs are available in the half composite side panel and many options are also available in the 3-Quarter and Full length format. The options available are indicated through the catalogue.

## DOORCOLOUR

A RANGE OF HERITAGE, BOLD  
AND TRADITIONAL COLOURS  
FOR COMPOSITE DOORS

**DoorColour is a collection of stunning shades that have been specifically developed for the composite door market.**

Using advanced paint technologies based on products used in the yacht industry, these paints are designed to stand the test of time and even withstand anything the British weather has to throw at them for many years. DoorColour is applied with state of the art spraying equipment to give a smooth, even finish whilst still maintaining the traditional grain definition of your composite door.

Whether you are looking to complement your period property with a Heritage shade or let people know that your home is the place to be, with a bright hue that showcases its unique personality, we have the colour to bring the best out of your door. If you like to unwind and shut out the world after a hard day, you can start the process at your front door with a shade that reflects the calming serenity of arriving home to your very own sanctuary.

### **Semi-Matt or Semi-Gloss finish**

We recommend Semi-Matt (20% sheen) for our Heritage Colours and Semi-Gloss (60% sheen) for our Bold range.

## Match your frame or create a contrast

DoorColour works perfectly with both smooth and grained PVC profiles, so if you want a matching or contrasting coloured frame with your Composite door, it's not a problem.

## ENERGY+

Modern composite doors are a combination of great looks and high performance, with strength, low maintenance and, probably most important of all, superb energy efficiency.

The energy performance of the door is achieved by a combination of the latest technologies, which includes the glazing elements. With Energy+, we offer a range of decorative glass that will achieve some of the lowest U values in the industry and will significantly enhance the overall thermal performance of the doorset. This is achieved by the use of Pilkington K, low emmissivity glass and filling the airspace with Argon to reduce the heat loss through the glazed area.

All our units come with warm edge spacer as standard to reduce heat loss at the edges of the glass.

We offer Energy+ as an option on the whole range of glass and provide it as standard on our Signature ranges.

Most heat loss occurs at the edge of the glass.  
Super Spacer prevents heat loss, keeping your home warm.

950x  
less  
conductive

## SECURITY+

Security is one of the key features of modern composite doors and the use of multi-point locking systems and anti-bump lock cylinders has become a standard throughout the industry.

The use of toughened glass in the glazing details is primarily for safety in the event of breakage and is, and does, offer a level of strength but is not a security glass.

With our Security+ option, all of the decorative glass designs featured in this brochure, are now available with a 6.8mm laminated glass leaf, which meets the requirements of EN12600 and is required for Secure by Design accreditation.

## 'As You Want It' - up to 50mm unit thickness

In this catalogue, the glass options are all designed for a 44 thick door slab. However, with the introduction to the UK market of thicker doors up to 70mm thick, there is an increasing demand for thicker insulated glass units. We offer our 'As You Want It' service on a large proportion of the range and you can specify:

**IG Unit Thickness up to 50mm**

**Standard or Low E 'Energy Plus' Glass**

**Toughened or Laminated 'Security Plus' Glass**

For a full list of options available in 'AYWI' format please refer to page 91.

## Guarantees, Warranties and Technical Performance

### INSULATED GLASS QUALITY

All our units are manufactured to the rigorous demands of EN1279, the European Standard for Insulated Glass, and gas filled units have also passed the 1279pt 3 testing for gas retention. We are also accredited to ASTM 2190 under the Insulated Glass Certification scheme for North America. All our insulated glass units are manufactured using warm edge spacer technology to reduce thermal transfer at the perimeter of the units and come with a 10 year warranty.

### SAFETY GLASS STANDARDS

Toughened glass is tested and certified to EN12150 and laminated glass to EN14449 standards. We only supply laminated glass units with 0.78mm interlayer which means it is P1A compliant and suitable for use in Secured by Design doorsets.

### SIGNATURE ART RANGE

Our range of Signature Art products are manufactured by traditional methods with individually hand cut glass surrounded by Brass or lead came and the decorative leaf is then encapsulated between 2 layers of safety glass (either tempered/toughened glass or 6.4mm laminated glass). The glass has been tested to EN12150 and EN14449 as applicable and the overall sealed unit to the EN1279 standard. As these items are manufactured using traditional art glass small seeds or blemishes in the glass are not deemed to be a fault and actually add to the products traditional look. The products are manufactured to exacting standards to reduce the amount of rattle that can occur when a door is slammed. All products are designed to ensure they pass our 50,000 slam test without breaking.

### ETCH AND FUSION ART RANGE

The Etch and Fusion Art range is manufactured either at our own facility or via a network of approved UK insulated glass manufacturers. These double glazed units are manufactured to EN1279 and the glass conforms to EN12150 or EN14449 for impact safety. Our Fusion Art designs are a combination of etched effect glass and hand made fused glass elements that are bonded using high performance UV adhesives. The decorative leaf is normally the outer pane of an insulated glass unit. In the manufacture of Fused glass small bubbles do occur and are part of the beauty of the product, therefore small imperfections are not deemed as faults.

### CRYSTAL ART RANGE

The range of Crystal Art units are manufactured using technology unique to us and are guaranteed not to crack, yellow or delaminate for a period of 10 years. The manufacturing methods for Crystal Art use liquid resin systems so occasional small air bubbles are inevitable and add to the appeal of the product. Our products have been independently tested in accelerated UV testing chambers with no noticeable change to the product after 10,000 cycling of high humidity and UV light.

### OVERLAY ART RANGE

The Overlay Art range is manufactured either at our own facility or via a network of approved UK insulated glass manufacturers. These double glazed units are manufactured to EN1279 and the glass conforms to EN12150 or EN14449 for impact safety. All the materials used in the manufacture of the Overlay Art ranges are manufactured by RegaLead. The decorative design is on the outer pane of the insulated glass unit and we therefore recommend that Antique or Brass coloured electroplated leads are used as they are more weather resistant. These lead finishes should only be cleaned with warm soapy water and the use of strong solvent based cleaners is not recommended. The coloured films used in the designs are manufactured using high quality polyesters and UV stable inks and are guaranteed not to fade more than 10% from their original colour over the 10 year warranty period.

### RESIN ART RANGE

The Resin Art range is manufactured either at our own facility or by a network of approved UK insulated glass manufacturers. The outline resins are applied using computer controller machinery manufactured by our own CadRam division to ensure an accurate plot of the design. The colours are applied later by hand and small imperfections can occur in the paint which should not be deemed as a fault. The technology used is manufactured and supplied by CadRam and the materials have been extensively tested for weathering performance and durability on the outer pane of an insulated glass unit. The colours are guaranteed not to fade more than 10% from their original colour over the 10 year warranty period.

### DOOR BLINDS AND SHADES

The range of Door Blinds are constructed as 26mm units and can only be used with the glazing cassette supplied. The blind and shade systems are magnetically controlled and fitted inside the cavity of a certified toughened glass insulated glass unit. The products are guaranteed against discolouration and mechanical failure for 10 years for the blinds and 5 years for the shades. The products are rigorously tested and in the laboratory are operated through 10,000 cycles to ensure years of reliable operation.

### VENTING SASH

The Venting Sash is a PVC sash window designed to fit into a standard 1/2 glazed door opening and is only suitable for use with 44mm door slabs. The product carries a 10 year guarantee covering mechanical performance, IG unit quality and water resistance. The product is supplied as a complete system without the need for a glazing cassette and therefore is only available in white. The Glass units in the Venting Sash are manufactured using warm edge technology from Intercept as opposed to conventional aluminium spacer bars and are certified. The complete system has been tested successfully to the Canadian standard CAN/CSA A440-M90 standard which covers air and water infiltration, wind load resistance, ease of operation and strength and resistance to forced entry.
